SitRep Perk

Call of Duty: Modern Warfare 2

1. Base Perk: SitRep

- **Effect:** Highlights enemy equipment (C4, Claymores, Tactical Insertions) with a **bright red glow**.
 - **Visible through walls** and across any distance, providing continuous awareness of enemy traps.

Affected Equipment:

1. **Claymores:** Commonly placed in high-traffic areas like doorways.
2. **C4:** Can be remotely detonated, so detecting it early is vital.
3. **Tactical Insertions:** Knowing enemy respawn locations helps predict their movements.

Advantages:

- Helps you avoid or destroy enemy explosives before they can be triggered.
 - Beneficial in **team modes:** Allows you to inform teammates of enemy trap locations, minimizing risk.
-

2. Pro Version: SitRep Pro

- **Enhanced Effect:** Increases the sound of **enemy footsteps** by 4x and reduces your own footsteps by 4x.
 - Helps you track enemies from further away while making it harder for them to hear you.

Unlock Requirement:

- **Destroy 120 enemy equipment** pieces (C4, Claymores, Tactical Insertions, etc.) to unlock SitRep Pro.

Footstep Detection:

1. **Amplified Sound:** You can hear enemies approaching from greater distances, even through walls.
 2. **Surface Awareness:** The sound changes based on what surface enemies walk on (e.g., metal, dirt), providing more specific location information.
-

3. Counter Tactics

- **Ninja Pro:** Counters SitRep Pro by silencing footsteps. Players using Ninja Pro remain undetectable by SitRep's sound enhancements.
 - **Recommendation:** Be cautious of enemies using Ninja Pro, as they can approach silently despite SitRep Pro.
-

4. Tactical Applications

- **For Snipers:** SitRep Pro is especially useful for **long-range** engagements, allowing you to hear threats before they get close.
- **In Team Play:** Relay the locations of enemy equipment to your team, preventing surprise attacks from hidden explosives.

Use SitRep Pro in objective-based modes to dominate by both detecting threats early and remaining undetected. ⋮
